

Number formation

At QPIA we believe it is essential to teach correct formations when children begin to write their own numbers. Teaching number formation with the correct starting points and the correct path to follow when forming a number **allows a motor memory to be successfully laid down in the brain.**

Number formation

Number formation

Draw a line and then you're done
Number one is lots of fun!

Number formation

Half a heart says "I love you"
add a line and it's a two!

Number formation

Around and around just like a bee
This is how you make a three!

Number formation

Down and across and down to the floor
Now you have made number four!

Number formation

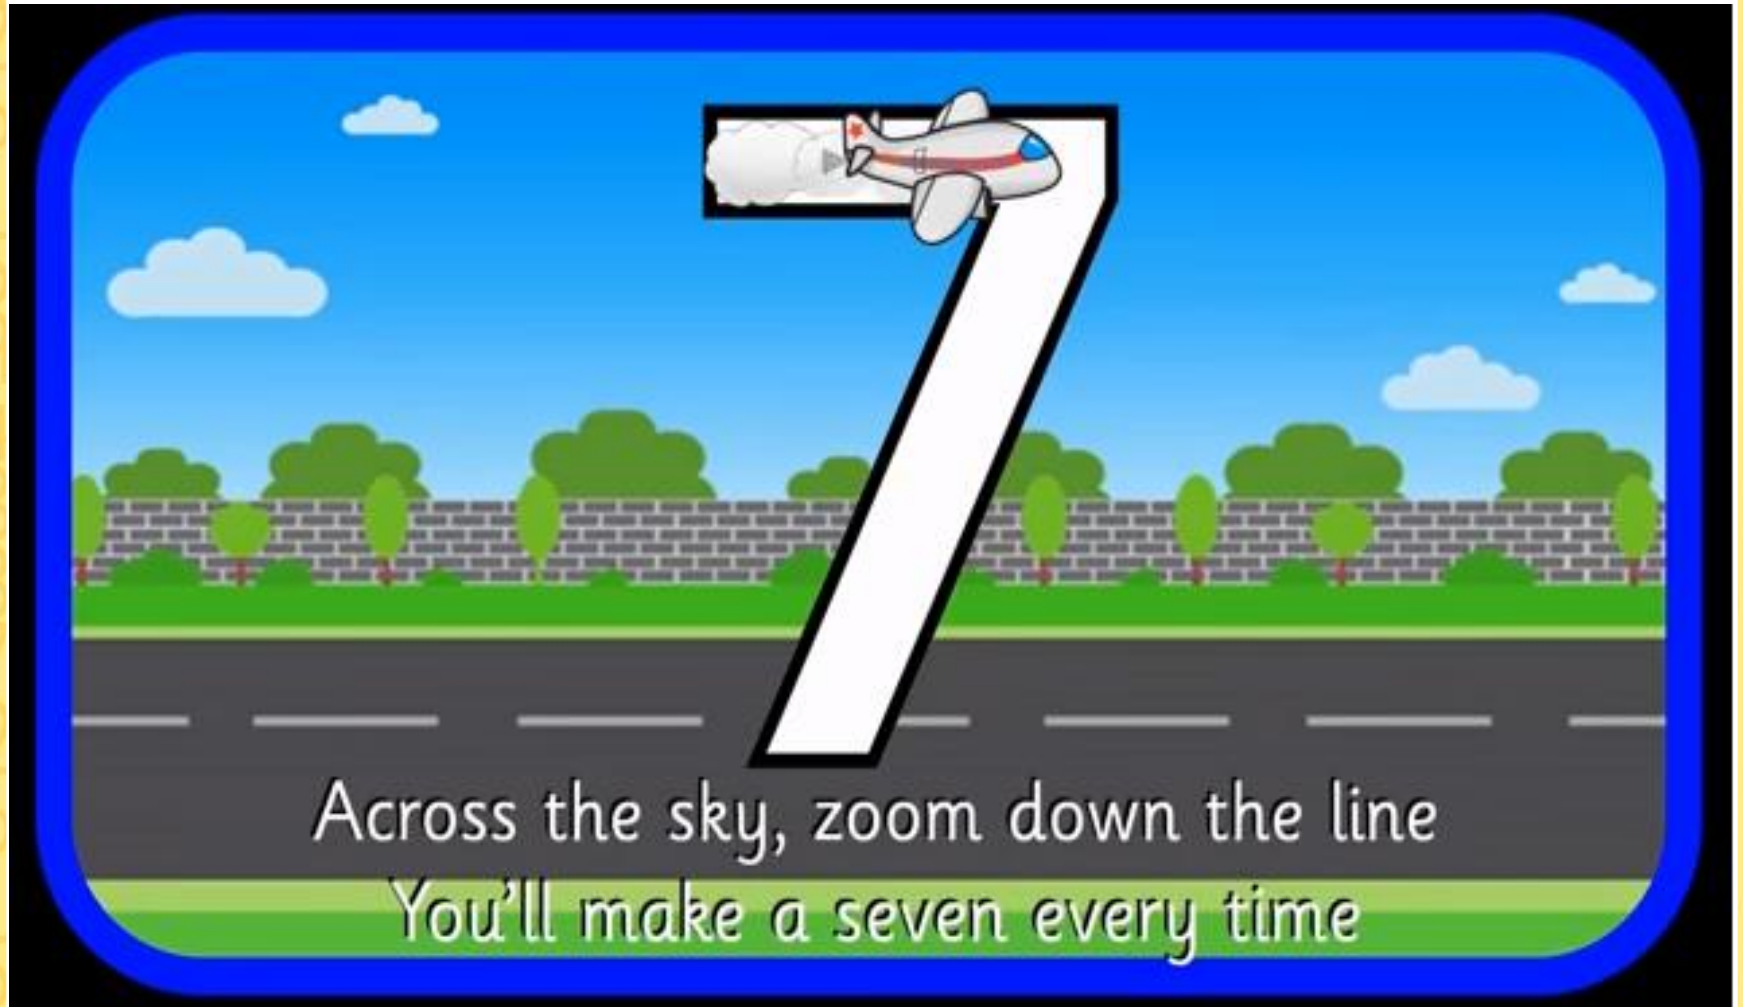

Straight neck and around the fat tummy
Hat on top and five is funny!

Number formation

Draw a 'c' then loop to the middle
You'll make a six with this riddle

Number formation

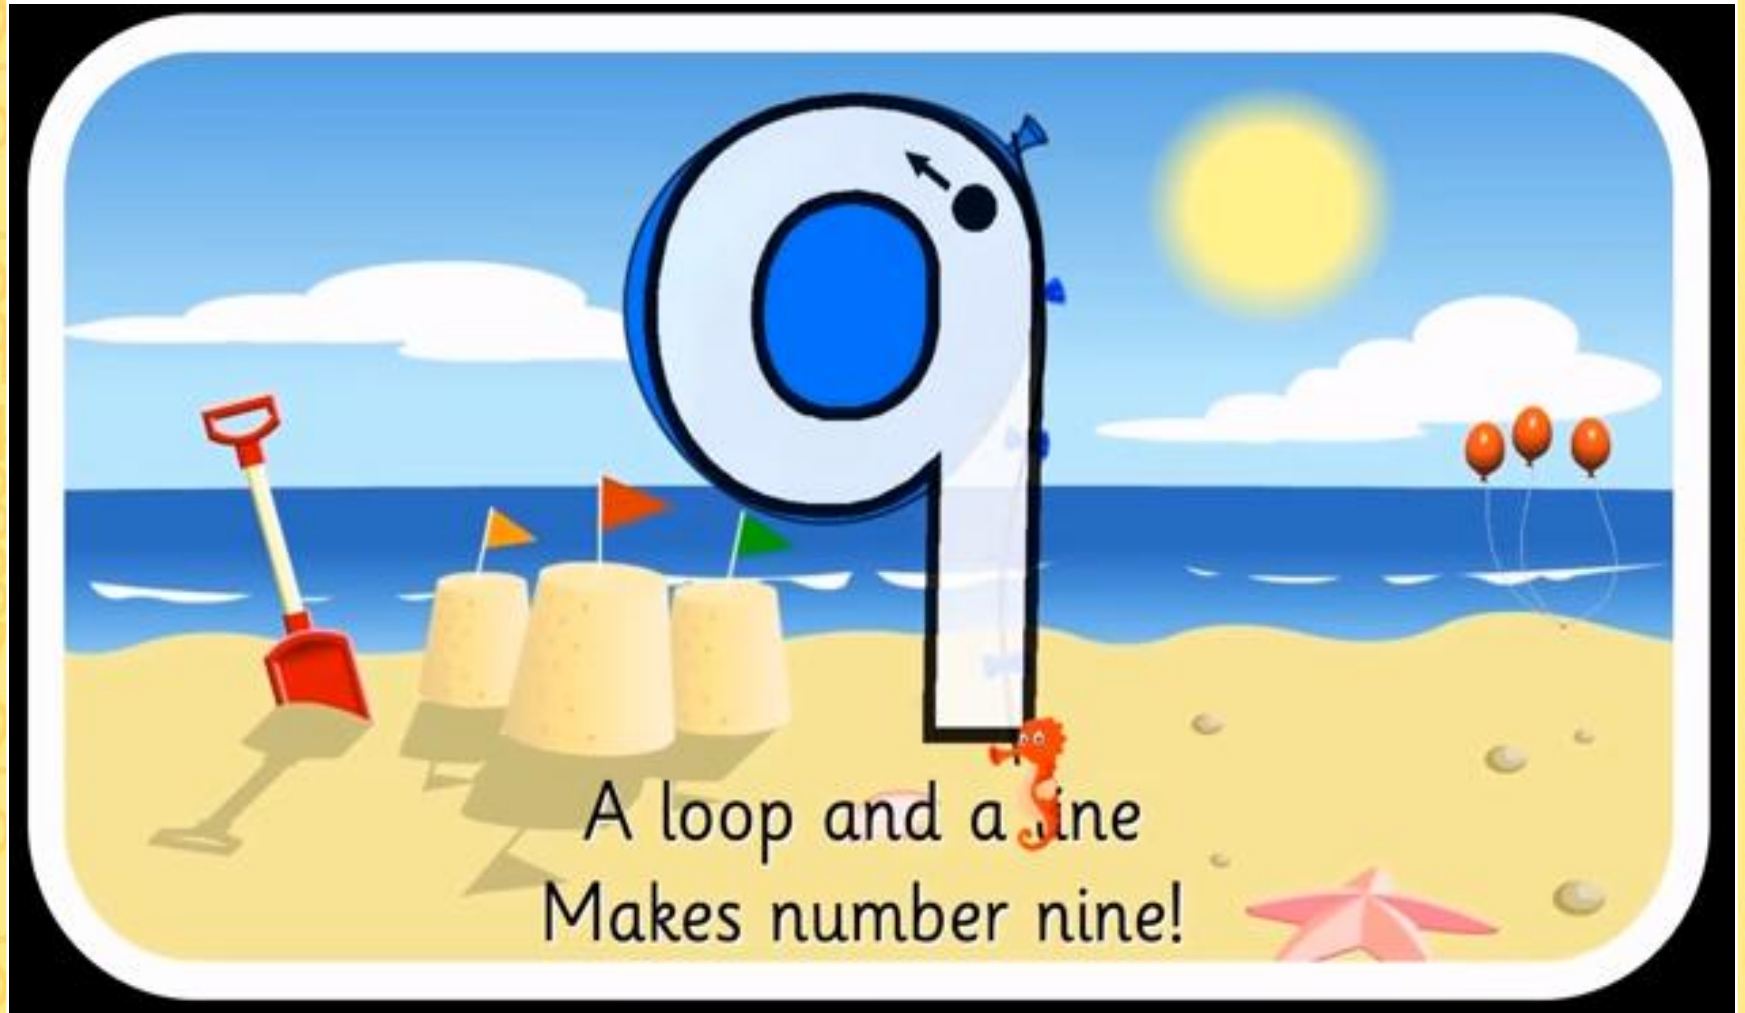

Number formation

Sammy snake eats his tail
To make an eight you can't fail!

Number formation

Number formation

Draw a one and a zero
You've made a ten you superhero!
